After the effective date of this act, whenever any registered land surveyor, whether a county surveyor or not, shall locate or reset any section corner or quarter section corner, or shall restore a lost section corner or quarter section corner or shall establish the center corner of any section, for any purpose, he shall mark such section corner or quarter section corner with a standard marker, as hereinafter specified, and shall make a full and complete record of said work, carefully describing in such record all evidence which was found on the ground, and from records, by which the location of said corner was identified and by what surveying process the proper position of such corner was determined, and describing such new witnesses, offset stakes or markers, and any other provisions which he made to provide for the perpetuation of such corner and within 10 days thereafter he shall cause to be filed in the public records of land surveys in the county in which the corner is located a true copy of such record, signed by the surveyor making such record. If the corner is so marked by the county surveyor he shall preserve such record in the files of his office. If the surveyor so marking such corner is not the county surveyor of said county, he shall file such record with the county surveyor in counties having a county surveyor, and in counties where there is no county surveyor, with the register of deeds thereof, who shall preserve such records in his office. HISTORY: CL 1948, 338.591.

338.592 Standard marker; construction, lettering, placing.

Sec. 2. The standard marker for indicating section corners and quarter section corners and center section corners in this state, after the effective date of this act, shall be made of bronze or copper, shall be circular in form, between 3 and 3 ½ inches in diameter, and the main portion thereof shall be of solid metal at least 1/2 inch thick. The lower portion shall be so constructed with standard threads that it may be screwed upon the end of a standard galvanized steel pipe of 1 inch, inside dimension, diameter. The phlange around said threads shall be at least 3/8 of an inch thick. Said marker shall be so constructed as by means of a lock washer, set screw, or other device, to prevent the unscrewing of the same from said pipe. The top of said marker shall contain the words "state of Michigan" and an arrow with the letter "N" indicating north, a diagram of a section which shall be 1 inch square with a horizontal line and vertical line bisecting the square to represent the quarter lines, the abbreviations 'Sec....., T....., R.....,' the words 'Set by ..., Date, ' and the words '\$50.00 fine for defacing or removing.' The surveyor shall stamp his initials and the date of setting said marker thereon at the time of setting said marker and shall indicate on the diagram on the top of the marker the location of the corner by stamping a letter 'O' at the proper intersection of lines. The surveyor shall use metal stamping dies making letters and numerals approximately 1/4 of an inch in height, for stamping said data on said marker. Said marker shall be placed upon the top of a galvanized steel pipe as aforesaid, which pipe shall be set into the ground at least 3 feet: Provided, however, That if because of rock formation, it is impossible to so set said pipe, the surveyor may secure said standard marker in some other permanent manner as best he can under the circumstances.

If because of some previously used marker, it is impossible to set said pipe upon said corner in a vertical position, the surveyor may set the same at an angle so as to bring the standard marker at the correct point.

When such section or quarter section or center section corner so marked is not in a public highway, said standard marker shall be set not more than 6 inches above the surface of the surrounding ground nor more than 6 inches below the surface of such

ground. When such corner occurs in a public highway which is not hard-surfaced, said marker shall be placed at least 6 inches below the surface of such highway. When any highway is hard-surfaced at such section or quarter section corner whether by concrete, tarvia or otherwise, a circular opening at least 6 inches in diameter shall be left at such corner and properly covered with a metal cover. Said uniform marker shall be placed in said opening beneath said cover.

Whenever a standard marker is placed in the roadbed of a public highway the surveyor shall establish 2 or more permanent markers at the edge of the right of way of said highway, recording the nature, bearings and distances thereof.

HISTORY: CL 1948, 338.592.

338.593 Standard marker; manufacture by prison industries, cost.

Sec. 3. Said standard markers, but not said pipe, shall be made by prison industries of Michigan under the direction of the state prison commission and said prison industries shall furnish the same to the several counties of the state at cost, which cost shall not exceed 75 cents per marker. Any registered land surveyor may obtain the same from the county at cost and shall furnish the same, together with the necessary steel pipe, to his client at cost. Every contract of employment of a registered land surveyor for work which involves the locating of any section or quarter section corner shall be construed to authorize such surveyor to obtain the necessary markers and pipe and to charge his employer for the cost thereof: Provided, however, That the board of supervisors of any county may by a majority vote thereof authorize such county to furnish such markers and pipe for use within said county to such surveyors free of charge.

HISTORY: CL 1948, 338.593.

In any prosecution under this act the records in the office of the county surveyor shall be admissible in evidence and shall constitute prima facie evidence of the facts stated in such records.

The word "person" as used in this act shall mean and include the plural as well as the singular, and any corporation, partnership or unincorporated or voluntary association unless the context shall require a different construction. 338.653 Barber shops; minimum prices, hours; authority of state board of examiners of barbers, investigation of unreasonable practices.

Sec. 3. Whenever it shall appear to the state board of examiners of barbers that unfair or unreasonable economic practices prevail among barbers, haircutters, barber schools, haircutting schools and colleges, in any county of the state of Michigan, which may tend to make insecure the economic status of the barbers and haircutters therein, or that the hours of operation of barber shops and haircutting shops are unreasonably long or irregular and tend to make difficult adequate and timely sanitary inspections, or tend to impair the health or efficiency of barbers or haircutters or to endanger the health or safety of their patrons, it shall be the duty of the board to investigate and determine whether the conditions or practices above mentioned, or any of them, prevail in such county, and if found to exist or to be threatened by conditions existing therein, the board may by official order, after due notice and hearing as provided for herein, promulgate scales of reasonable minimum prices to be charged for barber and haircutting services in such county and may establish reasonable opening and closing hours for barber shops and haircutting shops therein and may make and promulgate such

other reasonable orders, rules and regulations as may be calculated to promote the purposes of this act as herein expressed.

If upon investigation, the board finds that any such regulations should be made applicable to 2 or more adjoining counties, the board may include all such counties under 1 order, and if the board finds that regulations to be imposed should vary in different localities within the same county, in order equitably to attain the objectives of this act, the board may make such different regulations for such different localities as will make such order adjustable to differing economic or social conditions therein.

HISTORY: CL 1948, 338.653.

338.654 Notice of investigations and hearing on promulgating scale of prices and hours; witnesses, considerations.

Sec. 4. The practice and procedure of the board with respect to any investigation authorized by this act shall be in accordance with rules and regulations to be promulgated by the board, which shall provide for a reasonable notice to all persons affected by such orders, opportunity to be heard either in person, or by counsel, and to introduce testimony in their behalf at any hearing to be held for that purpose.

At least 30 days before making any order promulgating a scale of minimum service charges or opening or closing hours, the board shall adopt a resolution to investigate barbering and haircutting and barber shops and haircutting shop conditions in any 1 or more certain counties of the state, and within 15 days after such resolution is adopted the board shall cause personal notice, registered mail, or posting in a legal publication in the county or counties wherein the minimum service charge or opening or closing hours are to be adopted by said board, to be mailed to the last known address of all duly licensed barbers or haircutters residing and then regularly engaged in barbering or haircutting in such county or counties, notifying them of the adoption of such resolution and fixing the time and place for the hearing of evidence as to conditions existing in such county or counties.

For the purpose of such investigation, or of any hearing which the board is authorized to conduct, the board, or any member thereof, shall have power to administer oaths, take depositions, issue subpoenas, compel the attendance of witnesses, and the production of books, papers, documents and other evidence. In case of disobedience of any person in complying with any order of the board, or a subpoena issued by the board or any of its members, or on the refusal of a witness to testify to any matter upon which he may be lawfully interrogated, the judge of any circuit court of the county in which the person resides, on application by any member of the board, shall compel obedience by attachment proceedings as for contempt as in the case of disobedience to a subpoena issued from such court, or a refusal to testify therein. The sheriff of the county in which such person resides shall serve all orders and subpoenas herein referred to, and each witness who shall appear in obedience to a subpoena before the board, or member, shall receive for his attendance the fees and mileage provided for witnesses in civil cases in the circuit court of this state, which shall be paid upon presentation of proper vouchers approved by any 2 members of the board. No witnesses subpoenaed at the instance of a party, other than the board or 1 of its members, shall be entitled to compensation unless the board shall certify that his testimony was material to the matter investigated.

In making any investigation as to conditions existing in the barber or haircutting profession, the board shall give due consideration to the costs incurred in the particular county under investigation with regard to adequacy of income of barber and haircutting shop operators to assure full compliance with all sanitary regulations imposed by any law of this state, and the board shall give due consideration to healthful and reasonable working conditions and hours of service in barber shops, and may employ

such competent and qualified persons as it deems necessary in determining costs and reasonable hours under the provisions of this act.

Said board shall after due notice and public hearing prescribe and publish minimum prices and opening and closing hours for all barber shops and haircutting shops in said county or counties.

338.658 Licenses; grounds for denial, suspension or revocation, appeal.

Sec. 8. The board may decline to grant a barber's license or haircutter's license, or may suspend or revoke such license if already granted, upon due notice and opportunity of hearing to the applicant or licensee, or when satisfied that any such person has violated any order promulgated under the provisions of this act. Any applicant or licensee, considering himself aggrieved by any action of the board, may within 20 days after posting of the order of the board take an appeal from the action of the board to reverse, vacate or modify the order complained of, if, after hearing and upon consideration of the records, such court is of the opinion that such order was unlawful or unreasonable. Upon service of notice of such appeal the board shall with its answer file a transcript of the testimony in the hearing, and the original papers, or duly authenticated transcripts thereof, and other evidence in said court. No proceedings to vacate or reverse or modify a final order rendered by the board shall operate to stay the exe-

cution or effect thereof, unless the circuit court, or a judge thereof in vacation, on application and 4 days' notice to the board, shall allow such stay, in which event the petitioner shall be required to execute an undertaking in such sum as the court may prescribe, with sufficient surety to the satisfaction of the court, conditioned for the prompt payment of all damage arising from or caused by the delay in the enforcement of the order complained of.

Any order applying only to a person or persons named therein, shall be served by delivery of the order or a certified copy thereof, to such person by an authorized representative of the board or by the sheriff of the county in which such person resides, for services upon him in the same manner as summons is served in civil actions.

Any person who

Such license is not ambulatory and is issued for a specific location only. It shall be used only at the address specified in the application, unless the licensee is granted written approval for a change of location by the board. This shall not prevent a licensed funeral director or the holder of a license for the practice of mortuary science from conducting a funeral in another licensed establishment, nor shall it prevent such person from conducting a funeral at a church, home, public hall or lodge room, or elsewhere, providing such person maintains a fixed place or establishment of his own conforming to all requirements of section 9. All establishments and branches may be inspected by the board, or its representatives, at any time and shall meet and conform to the provisions of section 9 hereof and to such other lawful standards and requirements as may be determined by rule of the board in furtherance of the provisions of this act, and for failure to do so, the board may revoke such license in accordance with the procedure set forth in this act. All funeral establishments must be operated by a person or persons holding a funeral director's or mortuary science license, and shall have conspicuously displayed at the entrance of such establishment the name of the person or persons licensed to conduct such establishment. The name or names of the person or persons owning the funeral establishment must be registered with the board. Failure to make full and complete disclosure of the owner or owners shall be grounds for the revocation of the establishment license. A person whose license has been revoked hereunder shall not operate either directly or indirectly or hold any interest in any funeral establishment. Nothing herein contained shall prohibit a person whose license has been revoked from leasing any property owned by him for use as a funeral establishment so long as such person does not participate in the control or profits of such funeral establishment otherwise than as a lessor of the premises for a fixed rental not dependent upon earnings. All branch establishments must be operated by a person holding a funeral director's license or a mortuary science license.

Every funeral establishment or branch operated by a funeral director, who is not a licensed embalmer, must have in its employ a licensed embalmer whose license shall be constantly and conspicuously displayed in that establishment or branch.

The said board shall have the power to inspect the premises in which funeral directing is conducted or where embalming is practiced or where an applicant proposes to practice.

Any member of said board shall have the right to administer oaths to witnesses.

No action to suspend, revoke or cancel any license or resident training certificate shall be taken by the board until the accused licensee or resident trainee or his counsel has been furnished with a statement of the charges against him, or it, and a notice of the time and place of hearing thereof, the furnishing of such notice and the charges to be given said accused at least 15 days prior to the date of hearing. Such hearing shall be open to the public. The accused may be present at such public hearing in person or by counsel or both to defend himself against the charges made against him. If upon such public hearing the board finds the charges are true, it may revoke or suspend the license or resident training certificate of the accused. A stenographic report of such proceeding to revoke or suspend a license or resident training certificate shall be made at the expense of the board, and a transcript thereof kept in its files.

Any person or establishment who has been refused a license or whose license or resident training certificate has been suspended, revoked or rescinded, may appeal from the decision of the said board by filing with the said board a written notice setting forth that he, or it, feels aggrieved by such decision and takes an appeal therefrom, to the circuit court of the county within which such person resides, or in which the establishment is located. Upon the filing of such notice the board shall forthwith transmit to the clerk of the circuit court of said county the records and findings of such proceedings. An appeal from the circuit court judgment or decree may be reviewed by the supreme court.

The board may also refuse to issue or may refuse to renew, or may suspend or may revoke any license or resident training certificate, or may place the holder thereof on a term of probation after proper public hearing upon finding the holder of such license or resident training certificate to be guilty of any of the following acts or omissions:

 - d. Procuring by the licensee of persons known as "cappers", or "steerers", or "solicitors", or other such persons to obtain funeral directing or embalming; or allowing or permitting such "cappers", "steerers", or "solicitors", or other such persons to obtain funeral directing or embalming for a licensee or funeral establishment;

s. Being guilty of any dishonorable conduct which tends to reflect upon or discredit the profession of embalming or funeral directing.

No person licensed under this act shall remove or embalm a dead human body when he has information indicating crime or violence of any sort in connection with the cause of death, until permission of the coroner, or some other duly qualified person acting in the capacity of coroner, if there be no coroner, has first been obtained.

AN ACT to regulate the practice of nursing; to create a state board of nursing and prescribe its functions; to prescribe penalties for violations of this act; and to repeal certain acts and parts of acts.

The People of the State of Michigan enact:

338.1151 Nursing practice act of 1967; short title.

Sec. 1. This act shall be known and may be cited as the "nursing practice act of 1967".

HISTORY: New 1967, p. 175, Act 149, Eff. Nov. 2.

338.1152 Nursing practice act; definitions.

Sec. 2. As used in this act:

- (a) "Board" means the state board of nursing.
- (b) "Practice of nursing" means performance of the functions of a registered professional nurse, licensed practical nurse, licensed psychiatric attendant nurse or trained attendant. The practice of nursing does not include acts of medical diagnosis or the

prescribing of a medical remedy, treatment or medication. Selected acts delegated to unlicensed persons by licensed physicians, dentists or registered nurses, in the performance of their professional functions and performed under the delegation and direction of the licensed physician, dentist or registered nurse do not constitute the practice of nursing.

(c) "Practice of professional nursing" means the performance for compensation:

(i) Of any act requiring substantial specialized judgment and skill founded on formal education which provides knowledge and application of the principles of nursing based on biological, physical and social sciences, in the care, counsel, treatment or observation of the ill, injured or infirm, or for the maintenance of the health or the prevention of illness of others.

(ii) Of the supervising, directing or teaching of less skilled personnel in the carrying out of delegated nursing activities.

(d) "Practice of practical nursing" means the performance for compensation of acts in the care, treatment or observation of the ill, injured or infirm, or for the maintenance of the health or the prevention of illness of others, performed in accordance with education and preparation which has provided the practitioner with a lesser degree of specialized skill, knowledge, education or training than that required to practice as a registered nurse. A licensed practical nurse shall perform such acts only under the direction of a registered nurse or licensed physician or dentist.

(e) "Practice of nursing by a licensed psychiatric attendant nurse" means the performance for compensation of acts in the care of the mentally ill or mentally handicapped, or for the maintenance of the health or the prevention of illness of others, performed in accordance with education and preparation which has provided the practitioner with a lesser degree of specialized skill, knowledge, education or training than that required to practice as a registered nurse. A licensed psychiatric attendant nurse shall perform such acts only under the direction of a registered nurse or licensed physician or dentist.

Every applicant for a license shall furnish a sworn statement setting forth his present address, both of business and residence, the complete address of all former places where he may have resided or have been engaged in business during the last 5 years, and the length of such residence. Every applicant for a license shall also state the name of the person, firm, partnership, association, copartnership or corporation and the location of the place or places for which such license is desired, and set forth the period of time, if any, during which said applicant has been engaged in the business and such application shall be executed by such person or by any officer or member thereof. Such license when issued shall specify the particular crafts and trades for which the licensee has qualified. The commission shall not require any applicant to pay more than 1 license fee regardless of the number of crafts and trades for which he is licensed. Nothing contained in this section shall prohibit a specialty contractor from taking and executing a contract involving the use of 2 or more crafts or trades if the performance of the work in the crafts or trades, other than in which he is licensed, is incidental and supplemental to the performance of work in the craft for which the specialty contractor is licensed.

Refusal to issue license; hearing; proof of violation; written examination.

(4) No applicant shall be refused a license without an opportunity for a hearing before the commission. Loss of license for failure to maintain bond or cash deposit; reinstatement.

(7) The failure of the licensee to maintain in full force and effect the bond or cash deposit required by this section shall result in the suspension of his license which shall not be reinstated until a new bond or cash deposit has been furnished.

No license shall be issued to a corporation, partnership, association or organization unless each partner, trustee, director, officer, member and anyone exercising control meets all requirements for a license under this act other than those relating to knowledge and experience. The license of any corporation, partnership or other association or organization shall be suspended whenever any license or license application of any qualifying officer, partner, trustee, director, officer, member and anyone exercising control of the corporation, partnership or other association or organization is suspended, revoked or denied. The suspension shall remain in force until the commission determines that the disability created by the suspension, revocation or denial has been removed.

A suspension, revocation or denial of a license of an individual shall suspend, revoke or deny all other licenses held or applied for by that individual in any capacity issued under this act.

If the qualifying officer of a licensee ceases for any reason to be its qualifying officer, then said license is thereby suspended. However, upon request, the commission may in its discretion permit said license to remain in force for a reasonable time to permit the qualification of a new qualifying officer.

The qualifying officer shall be responsible for exercising such direct supervision or control of the building or construction operations as is necessary to secure full compliance with the provisions of this act and the rules and regulations made in pursuance thereof.

The People of the State of Michigan enact:

PART 1.

CHAPTER 1.

CLASSIFICATION.

340.1 School code of 1955; short title.

Sec. 1. This act shall be known and may be cited as "The school code of 1955".

HISTORY: New 1955, p. 475, Act 269, Eff. Jul. 1.

340.2 School districts; organization.

Sec. 2. Hereafter, except as otherwise provided in this act, each and every school district shall be organized and conducted as:

1. A primary school district; or
2. A school district of the fourth class; or
3. A school district of the third class; or
4. A school district of the second class; or

5. A school district of the first class.

HISTORY: New 1955, p. 475, Act 269, Eff. Jul. 1.

340.3 School districts; disorganization, apportionment of territory, taxes.

Sec. 3. Any school district shall lose its organization whenever there are not enough persons in such district qualified under the law to hold district offices or who will accept such offices. Upon the happening of either condition, the county board of education of the county containing the district shall declare by resolution such district dissolved and shall immediately attach the territory thereof, in whole or in part, to other districts already organized and make an equitable distribution of the money, property and other material belonging to such district among the districts to which the territory thereof shall be attached. If the district extends into more than 1 county, the county boards of education of all such counties shall meet jointly and sit as a single board for the dissolution of such district. The property of the disorganized district shall be subject to any increase in the constitutional limitation on taxes which have been voted by the electors of the district to which it is attached, whether the voted increase is for building and site purposes, general fund purposes, or for the retirement of bonds except it shall receive a credit in the amount of any levy remaining to be paid on any outstanding debt in the disorganized district, which shall be paid until debt is retired and shall also pay an amount equal to the amount levied for debt retirement by the district to which it is attached not to exceed 5 mills on the state equalized valuation in the disorganized district. All other taxes levied for the purposes of the combined school district, including taxes for the retirement of bonded indebtedness, shall be spread over the entire area of the combined district.

Bonded indebtedness; board of trustees of receiving district; taxes; audit.

If any disorganized district has a bonded indebtedness the district shall be attached in whole to another district by the intermediate board of education. The identity of the district shall not be lost by virtue of the attachment, and its territory shall remain as a separate assessing unit for the purpose of the bonded indebtedness until the indebtedness has been retired or refunded. The board of the district to which the disorganized district is attached shall constitute the board of trustees for the disorganized district having the bonded indebtedness, and its officers shall be the officers for the disorganized district. The board of the district to which the disorganized district has been attached shall certify and order the levy of taxes for such bonded indebtedness in the name of the disorganized district, shall not commingle the debt retirement funds of the disorganized district with those of the district to which it has been attached, and shall do all things relative to the bonded indebtedness required by law and by the terms under which the issuance and sale of the bonds were originally authorized. All other taxes levied for the purposes of the combined school district, including taxes levied for the retirement of bonded indebtedness, shall be spread over the entire area of the combined district. Immediately upon the attachment of a disorganized district to another district the intermediate board shall audit the assets and liabilities of the disorganized district and if any considerable discrepancy is found the intermediate board shall order the receiving district to pay this discrepancy. The disorganized district shall repay from any moneys available including voted millage that amount in a time to be determined by the intermediate board.

340.3a Disorganized school districts; assumption of bonded indebtedness; effect on original district; election; effective date; mutual assumption.

Sec. 3a. (1) Any time after 3 years from the effective date of the disorganization where the attached district has outstanding bonded indebtedness incurred after December 8, 1932, the combined district may assume the obligation of such bonded in-

debtedness and pay the same by spreading a debt retirement tax levy uniformly over the territory of the combined district, whenever the electors of the combined district shall approve an increase in the constitutional limitation on taxes for that purpose sufficient to provide a total tax levy when such increase is applied to the latest available taxable valuation of the combined district equal to or greater than such total levy when applying the increase in the limitation on taxes available or pledged for the bond issue or issues to the latest available taxable valuation of the district or districts as such territory existed prior to the disorganization and the school tax electors of the combined district shall approve the assumption of such bonded indebtedness. The assumption of the bonded indebtedness shall not operate to release the territory of the district originally incurring the bonded indebtedness from the final responsibility of paying the obligation or to rescind the increase in the limitation on taxes pledged to the bond issue or available for it in such district, nor be construed as so doing. The election may be held at any time following the effective date of attachment whenever a proposal is made to increase the bonded indebtedness of the combined district, and if such assumption of indebtedness is approved, it shall then become effective immediately. At the election to issue new bonds of the combined district any outstanding bond issues of any or all of the original districts may be refunded as a part of the new bond issue and, in that event, it shall not be necessary to present the question of assumption of such indebtedness as a separate proposition. Where a school district is attached to another school district under the provisions of section 3, the vote by the school electors of the combined district may be held at any time following the effective date of attachment.

(2) This section authorizes the holding of an election on the mutual assumption of bonded indebtedness in any school district attached prior to the effective date of this section to an operating school district under the provisions of section 3 at any time after the effective date of the attachment.

340.150 Board of education; nomination and election procedures.

Sec. 150. Any registered and qualified school elector of the school district shall be eligible to be chosen as a board member. The provisions of section 538 of this act shall be applicable to second class districts unless otherwise provided for. Nominations for board members shall be by petition signed by not less than 100 registered and qualified school electors of the district, which petition shall be filed with the secretary of the board, except that the petition shall be filed with the city clerk where the boundaries of the school district are coterminous with the city, at least 35 days before election, and no petition which does not have such number of signatures shall constitute a valid nomination. The officer with whom the petitions were filed shall determine if the candidates whose petitions are filed possess the qualifications required by law for membership on the board, and if any candidate does not possess the qualifications for membership on the board, the said officer shall notify the candidate immediately of that fact and the candidate's name shall not be printed on the ballot. The following method of nomination shall be operative if the board by resolution approves the adoption of such plan; nominations for board members shall be by vote of registered and qualified school electors at the primary election held before the regular school election; and in order to obtain the printing of the name of a candidate on the primary election ballot, a petition signed by not less than 100 registered and qualified school electors of the school district shall be filed with the secretary of the board, except that the petition shall be filed with the city clerk where the boundaries of the school district are coterminous with the city, at least 35 days before the primary election. In the primary election, any candidate for office who receives a majority of all the votes cast for candidates for that office shall thereby be elected. Where several candidates are to be elected to identical offices for the same term at the same election, a candidate shall be deemed to have received a majority in the primary if he received more than 1/2 of the average number of votes for each of such offices, said average to be determined by dividing the total number of votes cast for all candidates for such office by the number of offices to be filled; if more candidates have received a majority than the offices to be filled, then the candidates receiving the highest votes, respectively, shall be

deemed elected. In case no candidate, or an insufficient number of candidates, receives a majority at such primary election, then the 2 candidates for each office receiving the highest number of votes shall thereby be nominated, and in connection with elections where more than 1 office is to be filled, then the candidates receiving the highest number of votes, less than a majority, such candidates not to exceed double the number of offices remaining to be filled, shall thereby be nominated. At the final election, the candidates for each office receiving the highest number of votes shall be thereby elected.

The superintendent of public instruction shall have authority to approve or deny the proposal to initiate proceedings to effectuate the proposed consolidation, or he may require that 1 or more of such districts be not included in the proposed consolidation. His action in the matter shall be final. If the school districts proposed to be consolidated are located in more than 1 county, the request to initiate consolidation proceedings shall be addressed to the superintendent of the county containing the largest portion of the assessed valuation of the proposed consolidated district, and it then shall become his duty to carry out the proceedings hereinafter assigned to the county superintendent.

The number of registered general electors so certified shall be the basis

for determining the required number of signatures for calling an election on the question of consolidation as hereinafter provided. In registration districts, signatures of persons registering after the date of certification by the appropriate city or township clerk shall be valid signatures if such persons are registered at the time of signing a petition: Provided, That such additional registrations shall not affect the number of registered general electors originally certified to by the respective city or township clerks. In the absence of fraud on the part of the county superintendent in the determination of the validity of the signatures to any petition or error in the determination of the number of qualified signatures, his determination of the number of qualified electors signing each petition shall be final.

No petitions shall be required in the case of any district operating 12 grades when a resolution adopted by the board of the district requesting consolidation of districts has been filed with the county superintendent of schools. Sec. 408. The county superintendent shall give notice of the date, place or places, the proposition or propositions to be submitted, and the hours the polls will be open for the special election to the electors of the districts operating less than 12 grades, by causing notice thereof to be posted in 3 or more places in such affected districts not less than 10 days prior to such election and by publication at least once in a newspaper of general circulation in the territory of such districts 10 days or more before the election. The county superintendent shall in writing notify the secretary of each board of each affected district operating 12 grades of the day and hours for holding such special election. Upon receipt of such notice, it shall be the duty of each such secretary to give the statutory notice of the day, place or places, and the hours for holding such election and of the last day of registration in the case of a registration district. Each such secretary shall furnish timely proof of giving such notice to the county superintendent in the form of affidavits of posting notice or publication, as the case may be. In the event that a registration district which is required to vote separately is included in the proposed consolidation, the polls in each election unit shall be open from 7:00 o'clock in the forenoon until 8:00 o'clock in the afternoon, and the county superintendent shall give the required notice of the day of the election to the secretary of the board of such registration district at least 35 days prior to the election.

HISTORY: New 1955, p. 534, Act 269, Eff. Jul. 1;—Am. 1959, p. 252, Act 177, Eff. Mar. 19, 1960.

340.409 Consolidation of districts; form of ballot; conduct of election.

Sec. 409. The vote on the question of consolidating shall be by printed ballot and shall be in substantially the following form:

“Shall all of the territory of the following districts be united to form 1 school district?”

(Names of school districts to be consolidated to be listed here)

Yes ()

No ()”

The intermediate school district superintendent shall supply printed ballots, poll books and other necessary election supplies to the board or boards of election inspectors of the election unit of the districts operating less than 12 grades. The secretary of the board of each school district operating 12 grades shall have printed ballots prepared for the election and supply all election materials necessary for said election. The board of each such district shall appoint the necessary school electors to the board or boards of election inspectors. The members of the intermediate board of education shall act as the board or boards of election inspectors for the election held in the districts operating less than 12 grades. The intermediate board of education may appoint additional persons to the board or boards of election inspectors, and, if more than 1 place for holding such election is designated by the intermediate school district superintendent, the members of the intermediate board of education shall be apportioned by the intermediate school district superintendent to the boards of election inspectors. In the event that a member of the intermediate board of education or such other person appointed to a board of election inspectors is unable to be present at the election or is required to leave during the hours the polls are open, the remaining members of such board of election inspectors may appoint another person to fill such vacancy. Each member of a board of election inspectors shall take the constitutional oath of office before entering on his duties. Elections shall be canvassed by the board of canvas-

sers established by section 514a, this being section 340.514a of the Compiled Laws of 1948, and the result shall be certified by the secretary of the board to the intermediate school district superintendent of schools. In the case of a registration district voting separately and in more than 1 precinct, the secretary of the board of canvassers shall file a certified copy of the canvass of the election by the board with the intermediate school district superintendent. The affirmative vote of a majority of the school electors voting on the question in each of the election units, as hereinbefore defined, shall be necessary to effect the consolidation of the districts, and such consolidation shall become effective as of the day of the election on which the votes were cast.

Compensation of election inspectors, payment of expenses.

The members of the intermediate board of education and such other inspectors of election acting in the election unit of the district or districts operating less than 12 grades shall receive the same compensation for conducting such election as is authorized for election inspectors in a general state election. In the event the consolidation becomes effective, all expenses incurred for the election in all election units shall be certified to the board of the consolidated district and it shall be the duty of said board to pay the same out of the funds of the consolidated district. If the proposition to consolidate fails to be approved, as hereinbefore provided, the intermediate board shall determine the expenses of the election held in the election unit operating less than 12 grades and apportion such expenses equally among the several districts of such election unit. It shall be the duty of each such board of education to pay such apportionment to the intermediate board of education without delay.

340.410 Consolidated district; first board, appointment, acceptance, term, meeting.

Sec. 410. Within 10 days after the effective date of the consolidation of 2 or more school districts, the county board of education of the county containing the territory of the consolidated district shall appoint qualified electors of the district in the number required by the classification of the district to act as a board for said district. When the territory of a consolidated district extends into more than 1 county, such appointment shall be made by the county board of education of each county acting jointly as a single board. Within 7 days after his appointment, each member shall file with the county superintendent an acceptance of the office, accompanied by a written affidavit setting forth the fact of eligibility as provided in section 493 of this act. Except as hereinafter provided, each member so appointed to the board shall hold office until the next annual election, at which time there shall be elected by ballot a new board in accordance with the provisions of chapter 3 or chapter 4 of part 1 of this act for the election of a first board. Within 15 days after the effective date of the consolidation, the county superintendent shall call a meeting of the board appointed by the county board of education, at which meeting the board shall elect a president, a secretary and a treasurer.

District election; salaries of board members.

If the effective date of the consolidation is between the thirtieth day prior to the annual election and December 31, the board appointed by the county board shall at its first meeting call a district election to be held within 45 days from the day of the meeting. At the election, a board of the requisite number of members shall be elected for such terms as are required for the election of a first board in section 55 or section 107 of this act. The salaries of the members of the board shall be determined by the electors of the district at such election in accordance with section 71 or section 112. The election shall be in lieu of the first annual election and the first year of each term of office shall extend until the date of taking office following the next succeeding annual

Sec. 411. Within 20 days after the effective date of the consolidation of 2 or more districts, the board of each of the original districts shall account to the board of the consolidated district for all records, funds and property belonging to said original district and shall turn over the same to the board of the consolidated district. Upon receipt of such records, funds and property by the board of the consolidated district, the officers of the original district or districts shall be released from liability therefor and their offices terminated.

HISTORY: New 1955, p. 535, Act 269, Eff. Jul. 1.

340.412 Consolidated district; indebtedness of original district, retirement.

Sec. 412. If any district becoming part of the consolidated district has a bonded indebtedness incurred after December 8, 1932, or has outstanding tax anticipation notes at the time of consolidation, the identity of such district shall not be lost by virtue of such consolidation and its territory shall remain as an assessing unit for purposes of such bonded indebtedness and such tax anticipation notes until such indebtedness has been retired or the outstanding bonds refunded by the consolidated district. The board of the consolidated district shall constitute the board of trustees for such original district having such bonded indebtedness or tax anticipation notes and the officers of the consolidated district shall be the officers for said original district. The board of the consolidated district shall certify and order the levy of taxes for such bonded indebtedness and tax anticipation notes in the name of the original district, shall not commingle the debt retirement funds of the original district with funds of the consolidated district, and shall do all things relative to such bonded indebtedness and tax anticipation notes required by law and by the terms under which the issue and sale of the bonds and tax anticipation notes were originally authorized. All other tax levies for the purposes of the consolidated school district shall be spread over the entire area of the consolidated district.

340.413 Consolidated district; assumption of indebtedness.

Sec. 413. Any time after 3 years following the consolidation, any consolidated district may assume the obligation of the bonded indebtedness incurred after December 8, 1932, of any original district becoming a part of the consolidation and pay the same from the proceeds of a debt retirement tax levy spread uniformly over the territory of the consolidated district whenever the electors of the consolidated district shall have approved an increase in the limitation on taxes for that purpose and the school tax electors of the district have approved the assumption of such bonded indebtedness. Assumption of such bonded indebtedness of an original school district shall not operate to release the territory of the original district for the final responsibility of paying the obligation or to rescind the increase in the limitation on taxes pledged to the bond issue or available for it in the original district, nor be construed as so doing. When the bonded indebtedness of an original district has been so assumed, it shall be the duty of the board of the consolidated district to certify and order the levy of taxes for such bonded indebtedness equivalent in terms of money to those required by the terms un-

der which such indebtedness was originally incurred, and carry out all provisions of the original bond contract. The election may be held at any time following the effective date of consolidation whenever a proposal is made to increase the bonded indebtedness of the combined district.

340.414 Consolidated district; simultaneous election on consolidation, increase of constitutional debt limits, assumption of outstanding bonded indebtedness; petition, procedure.

Sec. 414. Whenever the petitions filed with the county superintendent of schools as set forth in section 403 of this act include a request that the questions of increasing the constitutional limitation on taxes of the consolidated school district for the purpose of providing a debt levy for the bonded indebtedness incurred after December 8, 1932, of 1 or more of the districts to become part of the consolidation and of assuming such bonded indebtedness and the question of increasing the constitutional limitation on taxes of the consolidated school district for operating purposes be submitted to the electors at the time of voting to form the consolidation, it shall be the duty of the county superintendent to include such question for the vote of the electors at each of the election units provided in section 407 of this act. The statement of votes cast on these questions shall be certified to the county superintendent by each board of election inspectors, including those of a district voting in more than 1 precinct: Provided, That only school tax electors shall be permitted to vote on the question of assuming such bonded indebtedness. The county board of education shall meet within 3 days after the day of the election and canvass the statements filed by the various election boards. The county board shall by resolution declare the result of the election on these questions and this resolution shall be the official declaration of the result thereof. The propositions shall be declared to have been adopted if the canvass of the votes cast shows that a majority of all electors voting on each proposition voted in the affirmative: Provided, That the proposition of forming the consolidation was adopted at said election as hereinbefore set forth. The proposition to form a consolidated district shall be declared to have failed regardless of the vote thereon if the proposition to increase the limitation on taxes for the debt levy, the proposition to assume such bonded indebtedness or the proposition to increase the limitation on taxes of the consolidated school district for operating purposes was not approved at said election.

Approval of municipal finance commission; form of request for increase of debt limits and consolidation.

The approval of the municipal finance commission to the sufficiency of the proposed increase in the limitation on taxes shall first be secured before the petitions are circulated within the districts to be consolidated. Whenever the electors approve a consolidation and an increase in the limitation of taxes and the assumption of the bonded indebtedness of 1 or more of the original districts as herein provided, the consolidated district shall assume the obligation of such bonded indebtedness and shall pay the same by spreading a debt retirement tax uniformly over the territory of the consolidated district, and the provisions of section 413 of this act shall apply relative to such levy, the continuing obligations of such original district or districts, and the rights and remedies of any bondholder. The request for including the question of increasing the constitutional limitation on taxes of the consolidated school district for the purpose of providing a debt levy for the bonded indebtedness incurred after December 8, 1932, of 1 or more of the districts to become part of the consolidation and for assuming such bonded indebtedness by the consolidated district shall be stated on the petition after the names of the school districts to be consolidated, as set forth in section 403 of this act, in substantially the following form:

"We petition that the question of increasing the constitutional limitation on taxes which may be assessed against all property in the consolidated school district to be formed as herein petitioned be increased by mills for a period of years, 19.... to 19...., inclusive, for the purpose of paying the bonded indebtedness of

(Name of School District or Districts)

and the question of assuming and paying such bonded indebtedness by the proposed consolidated district, and

We further petition that the question of increasing the constitutional limitation on taxes which may be assessed against all property in the consolidated school district to be formed as herein petitioned be increased by mills for a period of years, 19.... to 19...., inclusive, for operating purposes, be submitted to the electors at the same election in which the question of consolidating the above districts is submitted."

Sec. 414b. When the county superintendent of schools shall find that all the requests in writing or the resolutions of the board or boards which he has received under the provisions of section 402 of this act request that the provisions of section 414 be included with the question of consolidation, then the county superintendent of schools shall cause to have the petitions provided in section 403 include these provisions.

340.415 Consolidated districts; bonded debt of original district not subject to tax limitation, approval by school tax elector.

Sec. 415. The authority and procedures prescribed in this chapter for the assumption of bonded indebtedness of districts proposing consolidation shall apply to the assumption by the consolidated district of any bonded debt of the original districts which is not subject to the constitutional limitation on taxes: Provided, however, That the question of increasing the tax limitation in respect to such unlimited tax bonded debt shall not be included in the petitions for consolidation, nor shall the school electors be required to approve an increase in the tax limitation in respect to such debt. The assumption of such unlimited tax bonded debt shall be approved by the school tax electors at the time of the consolidation election or at any time after 3 years following the consolidation.

CHAPTER 4.

ANNEXATION OF ONE DISTRICT TO ANOTHER.

340.431 Annexation of school district; procedure.

Sec. 431. Any school district shall become annexed to another school district whenever the board of the annexing district shall have by resolution so determined and a majority of the qualified school electors of the district becoming annexed, voting on the question at an annual or special election, shall have approved such annexation. The vote on the question shall be by printed or duplicated ballot. Before such election shall be held, the board of the annexing district shall obtain the approval of the superintendent of public instruction of the proposed annexation. The election shall be held within 120 days after passage of the resolution by the board of the annexing district.

Transfer of funds and property; effective date.

The secretary of the board of the district in which the election was held shall file within 10 days after such election a certified statement of the vote for annexation with

the secretary of the board of the annexing district. Within 15 days after an election approving the annexation, the members of the board of the annexed district shall account to the board of the annexing district for funds and property in their hands as such officers, and shall turn over the same to the board of the annexing district. All property and moneys belonging to the annexed district shall become property of the annexing district and, except as hereinafter provided, all outstanding indebtedness of the annexed school district shall become the liability of the annexing district. Upon receipt of such funds and property by the board of the annexing school district, the officers of the annexed district shall be released from liability therefor and their offices terminated. The effective date of annexation shall be the date of the annexation election, but if an election is required in the annexing district under section 437, the effective date of annexation shall be the date of the election in the annexing district.

Annexation of 2 or more districts; bonded districts; validation of completed annexations.

Except as herein provided, the annexation of 2 or more districts may be by concurrent proceedings and the elections in the annexed districts may be held on the same or different days. When the annexing district and any of the districts to be annexed have bonded indebtedness, which is to be mutually assumed at the time of annexation as provided in sections 437 and 444 of this act, the annexation of each such district having bonded debt shall be by separate proceedings which shall not be concurrent with the proceedings for annexation of any other district. When a district to be annexed has bonded debt which is to be assumed by the annexing district, annexation of such district shall also be by separate proceedings which shall not be concurrent with proceedings by which any other district is annexed. Annexation proceedings for the annexation of 2 or more districts which have been heretofore completed or annexation elections which have been heretofore held concurrently or as part of a single annexation proceeding are hereby validated, ratified and confirmed with like force and effect as though such elections and proceedings had been fully authorized by statutes existing at the time.

340.432 District annexation; retirement of bond of annexed district.

Sec. 432. If any district which becomes annexed to another district has at the time of annexation a bonded indebtedness incurred after December 8, 1932, the identity of such district shall not be lost by virtue of such annexation and its territory shall remain as an assessing unit for purposes of such bonded indebtedness until such indebtedness has been retired or the outstanding bonds refunded by the annexing district. The board of the annexing district shall constitute the board of trustees for the annexed district having such bonded indebtedness and the officers of the annexing district shall be the officers for said annexed district. The board of the annexing district shall certify and order the levy of taxes for such bonded indebtedness in the name of the annexed district, shall not commingle the debt retirement funds of the annexed district with those of the annexing district and shall do all things relative to the bonded indebtedness required by law and by the terms under which the issuance and sale of the bonds were originally authorized. All other taxes levied for the purposes of the combined school district shall be spread over the entire area of the combined district.

HISTORY: New 1955, p. 538, Act 269, Eff. Jul. 1.

340.433 District annexation; assumption of bond of annexed district by combined district.

Sec. 433. Whenever any district having a bonded indebtedness incurred after December 8, 1932, is proposed to be annexed to a district which at the time has no such outstanding bonded indebtedness, the resolution of the board of the annexing district,

as set forth in section 431 of this act, may provide that such annexation shall not take effect unless the qualified school electors of the annexing district approve an increase in the constitutional limitation on taxes for the purpose of providing a debt levy for the bonded indebtedness of the district to be annexed and the school tax electors of the annexing district approve the assumption of such indebtedness. The sufficiency of such increase in the constitutional limitation on taxes as to amount and years shall first be approved by the municipal finance commission before being submitted to a vote of the electors of the district.

When such increase in the constitutional limitation on taxes and the assumption of such bonded indebtedness has been voted and the annexation becomes effective, the annexing district shall assume the obligation of the bonded indebtedness of the annexed district and pay the same by spreading a debt retirement tax levy uniformly over the territory of the combined district: Provided, That such assumption of the bonded indebtedness of the annexed district shall not operate to release the territory of the annexed district for the final responsibility of paying the obligation or to rescind the increase in the limitation on taxes pledged to the bond issue or available for it in the annexed district, nor be construed as so doing.

Sec. 435. Whenever any district having a bonded indebtedness incurred after December 8, 1932, proposes to annex a district which at the time has no such outstanding bonded indebtedness, the resolution of the board, as set forth in section 431 of this act, may provide that such annexation shall become effective only if the school electors of the district to be annexed approve an increase in the constitutional limitation on taxes for the same amount and for the same years still in effect for the bonded indebtedness represented by 1 or more of the outstanding bond issues of the annexing district and the school tax electors of the district to be annexed approve the assumption of such bonded indebtedness, at the same election at which the school electors of the district to be annexed approve the annexation.

If the increase in the constitutional limitation on taxes and the assumption of such bonded indebtedness are approved and the annexation becomes effective, the obligation of the bonded indebtedness shall become the obligation of the entire territory of the district and it shall be paid by spreading a debt retirement levy uniformly over the entire territory of such district. The assumption of the bonded indebtedness by the district shall not release the original territory from final payment of the debt.

340.436 District annexation; separate retirement of bonds of constituent districts.

Sec. 436. If any district which has a bonded indebtedness incurred after December 8, 1932, becomes annexed to another district which also has such a bonded indebtedness, the identity of the annexed district shall not be lost by virtue of such annexation and its territory and the territory of the annexing district shall remain as separate as-

sessing units for the purposes of such bonded indebtedness until the indebtedness of each has been refunded. The board of the annexing district shall constitute the board of trustees for the annexed district having such bonded indebtedness and the officers of the annexing district shall be the officers for said annexed district. The board of the annexing district shall certify and order the levy of taxes for such bonded indebtedness in the name of the annexed district, shall not commingle the debt retirement funds of the annexed district with those of the annexing district, and shall do all things relative to the bonded indebtedness required by law and by the terms under which the issuance and sale of the bonds were originally authorized. All other taxes levied for the purposes of the combined school district shall be spread over the entire area of the combined district.

340.437 District annexation; retirement of bonds of constituent districts by combined districts.

Sec. 437. Whenever any district which has a bonded indebtedness incurred after December 8, 1932, proposes to annex a district which also has such a bonded indebtedness, the resolution of the board, as set forth in section 431 of this act, may provide that such annexation shall become effective only if the school electors of the annexing district approve an increase in the constitutional limitation on taxes for the purpose of providing a debt levy for such bonded indebtedness of the district to be annexed and the school tax electors of the annexing district approve the assumption of such bonded indebtedness, and if the qualified school electors of the district to be annexed approve an increase in the constitutional limitation on taxes for the purposes of providing a debt levy for the bonded indebtedness of the annexing district and the school tax electors of the district to be annexed approve the assumption of such bonded indebtedness.

When such increases in the limitation on taxes have been voted and the annexation becomes effective, the district shall assume the obligation of the bonded indebtedness of both the annexing and annexed districts and pay the same by spreading a debt retirement tax levy uniformly over the territory of the district. The assumption of the bonded indebtedness by the district shall not operate to release the territory of the annexing district or of the annexed district for the final responsibility of paying the bonded obligation or to rescind the increase in the limitation on taxes pledged to the bond issue or available for it in each of the districts, nor be construed as so doing.

Whenever any district which has a bonded indebtedness incurred after December 8, 1932, proposes to annex a district which also has such a bonded indebtedness, the resolution of the board as set forth in section 431 of this act may provide that such annexation shall become effective only if the school electors of the district to be annexed approve an increase in the constitutional limitation on taxes for the same amount and for the same years still in effect for 1 or more of the bond issues of the annexing district and the school tax electors of the district to be annexed approve the assumption of such bonded indebtedness at the same election at which the school electors of the district to be annexed approve the annexation.

340.438 District annexation; assumption of outstanding bonds by combined district after three years.

Sec. 438. Any time after 3 years from the effective date of the annexation, where any one or more of the districts forming the combined district have outstanding bonded indebtedness incurred after December 8, 1932, the combined district may assume the obligation of such bonded indebtedness and pay the same by spreading a debt retirement tax levy uniformly over the territory of the combined district, when-

ever the electors of the combined district shall approve an increase in the constitutional limitation on taxes for that purpose sufficient to provide a total tax levy when such increase is applied to the latest available taxable valuation of the combined district equal to or greater than such total levy when applying the increase in the limitation on taxes available or pledged for the bond issue or issues to the latest available taxable valuation of the district or districts as such territory existed prior to the annexation and the school tax electors of the combined district shall approve the assumption of such bonded indebtedness. The assumption of the bonded indebtedness shall not operate to release the territory of the district originally incurring the bonded indebtedness from the final responsibility of paying the obligation or to rescind the increase in the limitation on taxes pledged to the bond issue or available for it in such district, nor be construed as so doing. The election may be held at any time following the effective date of annexation whenever a proposal is made to increase the bonded indebtedness of the combined district, and if such assumption of indebtedness is approved, it shall then become effective immediately. At the election to issue new bonds of the combined district, any outstanding bond issues of any or all of the original districts may be refunded as a part of the new bond issue and, in that event, it shall not be necessary to present the question of assumption of such indebtedness as a separate proposition. Where a school district is attached to another school district under the provisions of sections 440 to 443 of this act, the vote by the school electors of the combined district may be held at any time following the effective date of annexation.

340.466 Transfer of territory; effect on indebtedness; taxes, liability, certification, collection.

Sec. 466. Whenever territory is detached from a district which has a bonded indebtedness incurred after December 8, 1932, and transferred to another district, such territory shall remain as part of the district from which detached for the purpose of levying the debt retirement tax for such bonded indebtedness until such bonds have been redeemed or sufficient funds are available in the debt retirement fund for such purpose,

but shall not be part of the district from which detached for the purpose of any subsequent bond issue, nor shall any portion of such territory so detached be part of the district from which detached for any tax levy hereafter imposed for the purpose of any prior bonded indebtedness created or assumed at a time when such portion of such territory so detached was not a part of a district or territory approving or assuming such bonded indebtedness. Such territory shall be a part of the district to which transferred for all other purposes. Such territory shall not be subject to a bond debt retirement tax levy for bonded indebtedness of the district to which transferred existing at the time of transfer until the bonded indebtedness of the district from which transferred existing at the time of transfer has been retired or sufficient funds are available and earmarked in the debt retirement fund for such purpose, or whenever the board of education of the district to which the property is transferred, by resolution, effective for a period of not more than 3 years, exempts such property from such debt levy. The school officials of the district to which such territory is transferred shall certify the required debt retirement levy for the bonds of the district from which such territory has been detached, and the territory over which it is to be spread, to the proper taxing officials when certifying the other taxes to be levied by said district, and the tax collecting officials shall remit the collections thereon along with other tax collections to the district to which the property is transferred, and the officials of said district shall immediately transmit such collections to the district from which the territory was taken.

Payment of pro rata share by receiving district, procedure.

The district to which the land has been transferred may pay to the district from which the land has been detached the present value of the pro rata bonded indebtedness of the territory which has been thus detached. In such event the county board of education shall certify to the municipal finance commission the fact of the transfer, the description of the territory thus transferred, the bonded indebtedness of the district from which the territory has been detached, the assessed valuation of the district from which the territory has been detached, the assessed valuation of the territory thus detached, and such other information as the municipal finance commission may require. The municipal finance commission shall thereupon determine the pro rata share of the bonded indebtedness of the territory thus detached to the district from which the territory has been detached in accordance with sound bond accounting principles. The municipal finance commission shall thereupon certify to the county board of education the amount thus determined, and the county board of education shall certify such amounts to the districts affected. The district to which the territory has been transferred may pay to the district from which the territory has been detached such sum. Said settlement of the bonded indebtedness shall be made on the state equalized valuation in the year of transfer, and the district receiving such moneys shall apply the same in accordance with the terms and tenor of the bond issue. Any transfer made after September 1 in any given year shall be deemed a part of the territory from which detached for the purpose of the succeeding December tax levy, and the settlement in such case shall be made after the December tax levy in the year of transfer. Upon settlement of the bonded indebtedness by the district to which the territory has been transferred, then the territory shall become subject to the bond debt retirement tax levy for bonded indebtedness of the district to which transferred existing at the time of transfer. For the purpose of making such settlement, the district to which the territory is attached may use up to 15% of any state aid money in any one year.

When territory is attached to a district effective on or after September 1 of any year, school operational millage for that year shall be levied on property in such territory by the district from which the territory is detached. The school officials of the district entitled to levy school operational millage within the transferred territory, shall certify the school operational millage, and the territory over which it is to be spread, to the proper taxing officials when certifying the ad valorem taxes to be levied by the district.

If the county board of education or the joint boards fail to take action within the time limit prescribed in section 461, the appeal may be made to the state board of education within 10 days following the termination of the period. Such appeal shall have the effect of holding the effectiveness of the resolution from which appealed in abeyance until the appeal is acted upon by the state board of education.

(3) Points for each of the criteria shall be added together for each school. School districts having schools which receive at least 13 points under criterion (b) or a total of 18 points under criteria (a) and (b) shall be eligible for funding. Any school funded during 1969-70 shall be funded at the rate of \$100.00 per student for grades funded in 1969-70 regardless of such school's point score in 1970-71. Eligible schools with the highest number of points shall be funded in descending order at the rate of \$170.00 per student in grades K-6. When funds are insufficient to fully fund all eligible schools with the same point scores, the available amount shall be prorated on the basis of enrollments among the schools having the same point score. Any school funded under this section shall not be funded for remedial reading programs under section 12.

(4) For a school to be eligible for assistance under this section, a school district shall verify that its anticipated expenditure of this section funds in the applicant school is in addition to the per-pupil expenditure for elementary instruction from state and local sources other than this section and section 12 for the previous year for the applicant school.

(5) School districts receiving moneys as a result of subsection (3) shall demonstrate to the state board of education that such moneys will be used for improving pupil

achievement through a reduction of pupil-adult classroom ratios in schools identified under subsection (3) and through the purchase of instructional, technological and curriculum materials.

(6) The state shall reimburse 75% of direct salary costs of paraprofessional personnel to be used as home-community coordinators, attendance aides, tutors and others in schools qualifying under this section.

(7) Schools participating in this program under this section shall maintain an in-service training program to achieve higher qualifications for the assignment and may finance such in-service training programs.

(8) Not more than 0.5% of a school's total allocation under this section shall be deducted and retained by the department of education for the purpose of its evaluating the programs conducted under this section. The state board of education shall report to the governor and the legislature not later than October 1 of each year the results of the evaluation studies including a report on exemplary programs which promote academic achievement.

(9) The department of education shall approve programs within the funds provided herein. All appropriations under this section are to cover a full year, September 1 through August 31, operation and include summer school programs.

(10) School districts having schools that received aid under this section in 1969-70 for grades K-8 shall be funded for grades K-8 for those schools if the schools are otherwise eligible under the provisions of subsections (2) and (3). If a K-8 school has no grade 4, the determination for assigning points shall be made on a similar basis to that used in subsections (2) and (3).

Sec. 8a. (1) To every district in the state, except as otherwise provided in this act, there shall be appropriated where required to meet the provisions of this act, a sum determined as provided in subsection (2) plus the amount allocated for tuition and transportation. 388.618b Basic allotments to school districts; formula; 1971-72; tax levy.

Sec. 8b. (1) Except as otherwise provided in this act, beginning with the 1971-72 school year there is appropriated to every school district where required to meet the provisions of this act a sum computed in the manner prescribed in this section plus the amount allocated for tuition and transportation.

This amount shall be deducted from \$420.00 which is the gross allowance per membership pupil in the school district. When valuation increases are placed on property the existing operational millages shall be decreased by the same percentage as the increase in valuations, provided, however, that the school board by its own resolution may continue the same levy.

(3) For each 1/10 mill levied by a school district beyond 10 mills up to and including 20 mills, there shall be allocated a sum equal to \$3.00 less the amount produced by each additional 1/10 mill levied by the school district multiplied by the state equalized valuation behind each pupil in membership in the school district.

(5) For the 1971-72 school year only, each school district which levies at least the amount of operational millage levied in 1970-71 or 20 mills for operational purposes shall receive a net allowance of at least \$5.00 per membership pupil more than it received during 1970-71. (6) In 1971-72, a school district shall not receive more revenue per membership pu-

pil from this section and the local property tax levy than it received from section 8a and the local property tax levy in 1970-71 plus the increase authorized in this subsection which increase shall not exceed the per membership pupil revenue for the next higher grouping. Any former member of the armed services in attendance in the public schools, the cost of whose instruction is not paid for by other state funds or by the federal government, shall be counted in membership regardless of age. Handicapped children enrolled under the provisions of sections 771 to 780 of the school code of 1955 may be counted in membership for the ages provided in those sections.

Any child under court jurisdiction who is placed in a private home or in a private or public institution located outside the school district in which his parents or legal guardians reside may be counted as a resident of the school district he attends if other than the district of his parents or legal guardian and shall be counted as 1 ½ memberships.

The total membership of such children shall be computed by adding the membership days attended by all such children up to April 1 of the current school year and dividing the total by the number of days in the school year of the district up to April 1 of the current school year. The membership thus obtained shall be certified by the district to the superintendent of public instruction who shall adjust the total membership of the district accordingly in determining the school aid to be paid during the current fiscal year.

Any child whose parents or guardians live on land in this state over which the federal government has taken exclusive jurisdiction and which has not been attached to a school district for educational purposes may be included in membership by the school district which he attends and for the purpose of this act be considered a tuition pupil.

The superintendent of public instruction shall give a uniform interpretation and evaluation of memberships other than full-time memberships.

Hearing impaired, physically or visually handicapped.

(c) School districts conducting programs for the hearing impaired, physically handicapped and visually handicapped shall be allocated an additional amount not to exceed 75% of the cost for equipment, for teachers who teach others to transcribe books into braille or books for visually handicapped students at all levels and for expenses incurred in transcribing and recording educational materials, including machines, paper and binding.

Intermediate school districts; trainable programs.

Each intermediate school district is authorized to use moneys in its general fund or special education fund not otherwise restricted or contributions from local school districts or individuals for the support of such programs.

(e) The amounts appropriated herein for special programs under the provisions of sections 771 to 780a and 307a to 324a of the school code of 1955, and for school social workers, school diagnosticians, physical therapists and occupational therapists, shall not exceed 75% of the actual cost of salaries, exclusive of administrative and clerical salaries, not to exceed \$8,100.00 for any individual salary for such programs as determined by the superintendent of public instruction. The salaries of directors and supervisors of special education programs whose full-time activities are devoted solely to special education programs shall be reimbursed under the provisions of this subsection. From the total amount appropriated in section 1 there is appropriated a sum not to exceed \$50,000,000.00 for special education programs.

Remedial reading programs.

(f) School districts offering remedial reading programs approved by the superintendent of public instruction shall be entitled to 75% of the actual cost of the salary, not to exceed \$8,100.00 for any individual salary, of each remedial reading teacher approved by the superintendent of public instruction. (a) An "elementary tuition pupil" is a child of school age attending school in grades kindergarten to sixth in a district other than of his residence and whose tuition is paid by the school board of the district of his residence. If the district in which such child is in attendance does not operate grades above the eighth, elementary tuition pupils shall also include pupils enrolled in the seventh and eighth grades.

High school tuition pupil.

(b) A "high school tuition pupil" is a child of school age attending school in grades seventh and eighth in a district other than that of his residence and in which grades above the eighth are being maintained, and in grades ninth to twelfth in a district other than that of his residence and whose tuition is paid by the school board of the district of his residence.

Date and formula for charging tuition; nonresident pupils in part time membership, additional allowance.

(c) Every school district having tuition pupils in membership on the fourth Friday following Labor day of each year, shall charge the school district, in which such tuition pupil resides, tuition in at least the amount of the differences between the per capita cost as determined in section 14 and the per pupil membership allowance provided in sections 8 and 10. Except that in the case of nonresident pupils in part time membership, an additional allowance for such child shall be made to the school district in an amount equal to the difference between the prorated per capita cost as determined in section 14 and the prorated per pupil membership allowance as provided in sections 8 and 10.

The per capita operation cost shall be determined by dividing the total expenditures for each school district, less the amount spent for such items as are excluded from the actual operation cost of the district as defined in this section, by the membership in grades kindergarten to 12, inclusive. For the purpose of determining the amount of tuition to be charged for nonresident pupils enrolled in grades kindergarten to 6, inclusive, the per capita cost thus obtained shall be used. 388.624a Capital outlay assistance; formula; limitations.

Sec. 14a. (1) Beginning in 1971-72 from the total amount appropriated in section 1 there is appropriated to every school district operating a kindergarten through twelfth grade program an amount to be computed by the following formula:

$$\left\{ \begin{array}{l} \text{State equalized} \\ \text{valuation of the} \\ \text{district} \end{array} \right\} \times \left\{ \begin{array}{l} \text{Annual local millage rate} \\ \text{necessary to pay debt service} \\ \text{and building and site require-} \\ \text{ments if total debt service} \\ \text{and building and site require-} \\ \text{ments were raised locally} \end{array} \right\} \times \left\{ \begin{array}{l} \text{District} \\ \text{state} \\ \text{1-equalized} \\ \text{valuation} \\ \text{per child} \\ \hline \$30,000.00 \end{array} \right\}$$

All funds received under the provisions of this section shall be used to assist the district in paying debt service obligations incurred as the result of borrowing for capital outlay projects and in meeting building and site fund requirements.

(2) All reimbursements under this section will be based on prior year expenditures by a district for debt service and prior year taxes collected from building and site levies. Not more than \$40,000,000.00 shall be distributed under this section. Any law or school board action to the contrary notwithstanding, the school debt service and building and site millage authorized and levied by a school district which levies at least 7 mills for either or both of such purposes shall be reduced in any year funds are received under this section by an amount equal to that necessary to be levied in the district in that year to produce the amount of funds which the district receives under this section. This requirement shall in no way prohibit the eligibility of the district to elect to borrow from the state under Act No. 108 of the Public Acts of 1961, as amended, being sections 388.951 to 388.963 of the Compiled Laws of 1948.

Section related to districts experiencing financial hardship; conditions for additional aid; formula.

388.626 Repealed. 1964, p. 567, Act 285, Eff. Jul. 1.

Section prescribed conditions and limitations on school aid to county school districts.

388.626a Intermediate school districts; apportionment of aid; operating budget; data processing programs.

Sec. 16a. (1) There shall be apportioned to each intermediate school district an amount equal to the operating budget of the district multiplied by the percentage that the total state aid received by all of the constituent districts of the intermediate district under the provisions of the state school aid act in effect during the preceding school year was of the total current operating expenditures of all the constituent districts of the preceding year, except that no intermediate district shall receive aid on a basis of less than 50% of its approved budget.

(2) The operating budget of the intermediate unit shall be the budget finally adopted by the board of education in accordance with all constitutional and statutory hearings and after the allocation of millage has been made by the county tax allocation board. The budget total shall be reduced by the amounts allocated for building and site expenditures, cooperative educational programs, and any program not approved by the superintendent of public instruction.

(3) The current operating expenditures of the constituent districts shall be in accordance with the classification of expenditures used in reporting receipts, expenditures and other financial data to the superintendent of public instruction.

(4) Intermediate districts formed by the consolidation of 2 or more county or intermediate school districts shall be entitled to an additional allotment of \$3,500.00 for each county included in the new district for a period of 3 years following consolidation.

(5) Beginning in 1971-72 from the amount appropriated in section 1 there is appropriated a separate fund of \$400,000.00 for the purpose of providing funds to intermediate districts which operate data processing programs, using a service fee method of financing on a cooperative basis with local school districts.

388.627 Valuation of school districts; formula; reductions.

Sec. 17. The valuation of any whole district shall be the total assessed value of the property contained therein as fixed by the local assessing officer or officers, township or city board of review, which in turn shall be proportionately increased or decreased to the basis of the valuation of the township or city containing said district, as fixed by the county board of equalization, and the result in turn proportionately increased or decreased to the basis of the valuation of the county containing said district as last fixed by the state board of equalization.

The valuation of a fractional school district shall be the sum of the valuations of the fractions thereof, each of which shall be computed in the same manner as a whole school district.

The valuations of property assessed under the provisions of Act No. 189 of the Public Acts of 1953, as amended, being sections 211.181 and 211.182 of the Compiled Laws of 1948, shall be deducted from the total valuation of a district in cases where school taxes levied against such property are not collected from the lessee or user of the property. The credit so obtained by a district in the application of the formula provided in section 8a shall forever be a lien against the district and shall be paid by the district to the school aid fund at such time only as the taxes referred to above are collected.

The valuation of property located on land over which the federal government has exclusive jurisdiction and upon which school taxes have been levied in accordance with federal law shall be deducted from the total valuation of a district if credits against such taxes, as permitted by federal law, result in a payment to the district of an

amount less than the product of the valuation of such property, times the millage referred to in section 8a. Any amount of such taxes collected shall be deducted from the school aid to which the district is entitled under sections 8, et seq., up to an amount equal to the above product.

Whenever taxes levied for operating purposes against property constituting at least 10% of the valuation of a district are paid under protest and are thus unavailable to the district, the total valuation of the district for the purposes of this act shall be reduced by the valuation of such property. The credits so obtained by a district in the application of the formula provided in section 8a shall forever be a lien against the district and shall be paid by the district to the school aid fund at such time only as the taxes referred to above are collected.

The valuation of any district shall be reduced under the following conditions and in the following manner:

(a) An application may be filed by the school district in form and content as described by the superintendent of public instruction showing the total taxes levied on property located within the school district by all taxing agencies including the school district but excluding taxes levied for school operating purposes.

(b) The superintendent of public instruction shall subtract such total taxes from the total of such taxes as last reported by the state tax commission for the entire state.

(c) The superintendent of public instruction shall determine the tax rates resulting from dividing the figure obtained in subdivision (b) by the comparable valuations.

(d) If the resulting tax rate for the applicant school district is 125% or more of the resulting tax rate for the balance of the school districts of the state, the valuation of the applicant school district shall be reduced by the percent by which the resulting tax rates on property located within the applicant school district exceeds 125% of the resulting tax rates on property located in all other school districts of the state. Any district qualifying for state aid under 1 of the formulas provided in subsection (2) of section 8a shall not qualify for state aid under a different formula in that subsection solely as a result of the reduction in valuation under the provisions of this section. Not more than \$20,000,000.00 shall be paid as the result of reduction of valuation under this section.

388.628 School aid; increase to district for territory attached from dissolved district, formula.

Sec. 18. Whenever a school district, in whole or in part, is attached to another district by an intermediate board of education acting under the provisions of section 3 or section 441 of the school code of 1955, the amount of state aid to be paid to the district to which territory is attached during the fiscal year of attachment and the following 6 fiscal years shall be increased when the district already is eligible for state aid beyond primary money, and the state equalized valuation per resident membership child in grades kindergarten through 12, in the territory attached, is less than the state equalized valuation per resident membership child in grades kindergarten through 12 in the district to which territory is attached.

The amount of the increase shall be computed by multiplying the number of children in resident membership in kindergarten through 12 in the territory attached by the difference between the state equalized valuation per resident membership child in kindergarten through 12 in the receiving district and the state equalized valuation per resident membership child in kindergarten through 12 in the territory attached and the product thus obtained by the millage levied for operating purposes over and above

4-1/4 mills in the receiving district. The increase shall be 3/4 of this product for the second year, and 1/2 of this product for the third year, and 1/4 of this product for each of the fourth through the seventh years.

The amount of the increase shall be computed each year on the basis of the facts at the date of attachment except that the millage levied for operating purposes shall be the actual millage spread each year.

The number of student residents of the attached areas and counted as resident students on September 27, 1968 shall serve as the basis for the payment of these funds.

This money is to be deposited in the general fund account of the districts receiving the students and used for the purposes of bringing about uniformity of educational opportunity for all the pupils of the enlarged school district. The number of students each school district receives under the provisions of Act No. 239 of the Public Acts of 1967, as amended, shall be determined by a membership count as made by the state department of education on September 26, 1969. A report of the membership audit shall be sent to the state treasurer who shall pay the required amounts from the school aid fund prior to December 31, 1970. Not more than \$600,000.00 is appropriated for the purposes of this subsection.

These schools perform, in addition to their sectarian function, the task of secular education. The legislature declares as public policy of the state that the public good and general welfare require that state appropriations now provided to public school districts under this act for the purpose of furnishing opportunities for public school children to secure a quality secular education be extended to assist in providing opportunities for quality secular education to children attending nonpublic elementary and high schools, as part of a general program to foster and encourage knowledge so as to provide a mature citizenry capable of contributing to good government, and to the safety and the economic and civil well-being of all the people of this state.

Sec. 7. Not less than 90 days nor more than 6 months following approval of an intermediate district plan as provided in section 6 of this act elections shall be held according to one of 2 methods. The intermediate district committee shall determine which election method shall be used.

Method 1. The entire area encompassed by the intermediate district plan shall vote as a unit on the question: "Shall the approved reorganization plan for the intermediate district be adopted?"

Yes ()

No ()"

If a majority of the qualified electors present and voting approve the plan it shall be declared adopted and shall become effective throughout the area on the date of the election if the election is held after April 30 but before September 1. The effective date shall be July 1 following if the election is held after August 31 but before May 1.

Method 2. The proposed districts provided for in the approved plan shall vote by proposed districts on the question: "Shall the approved reorganization plan for a proposed local district within the intermediate district of be adopted?"

Yes ()

No ()"

If a majority of the qualified electors present and voting in a proposed district approve the plan for that proposed district it shall be declared adopted and shall become effective throughout the proposed district on the date of the election if the election is held after April 30 but before September 1. The effective date shall be July 1 following if the election is held after August 31 but before May 1.

If election method number 1 is adopted by the intermediate district committee and if the question voted on fails to obtain an affirmative majority, then another election using method number 2 shall be held not less than 90 days nor more than 6 months after the date of the first election. The results of this election using method number 2 shall be final and the requirements of this act shall have been met.

If the intermediate district plan provides that the boundaries of an existing school district shall remain the same such district shall not participate in an election held under either method number 1 or method number 2.

If the election is held under method number 1, the plan to be voted on shall not cause an existing school district to be divided between 2 intermediate districts but property transfers may be made later according to the provisions of chapter 5, part 2 of the school code. The plan may provide for division of districts within an intermediate district.

If and when voting method number 2 is used, the plan shall not cause an existing school district to be divided between 2 proposed local districts within the intermediate unit but property transfers may be made later according to chapter 5, part 2 of the school code.

No property transfers shall be made after the approval of the intermediate district plan by the state committee until after the elections provided for in this section have been held.

The question of assumption of bonded indebtedness shall not be included in any election held under the provisions of this act but the provisions of sections 412 and 413 of the school code regarding assumption of debt shall apply.

The qualifications of electors shall be the same as now provided in the statutes for votes on consolidation and annexation and the provisions of the general election laws shall apply.

AN ACT to promote the safety, welfare and educational interests of the people of the state of Michigan by regulating the construction, reconstruction and remodeling of certain public or private school buildings or additions thereto, by regulating the construction, reconstruction and remodeling of buildings leased or acquired for school purposes, and to define the class of buildings affected by this act; to prescribe the powers and duties of the superintendent of public instruction, the state fire marshal, architects, engineers and school board members with respect thereto; to prescribe penalties for the violation of this act; and to repeal all acts and parts of acts, general, local and special, inconsistent with or contrary to the provisions of this act. Am. 1941, p. 192, Act 148, Eff. Jan. 10, 1942.

The People of the State of Michigan enact:

388.851 School buildings; construction requirements; waiver.

(a) All plans and specifications for buildings shall be prepared by, and the construction supervised by, an architect or engineer who is registered in the state of Michigan. Before the construction, reconstruction or remodeling of any school building or addition thereto is commenced, the written approval of the plans and specifications by the superintendent of public instruction or his authorized agent shall be obtained. The superintendent of public instruction or his authorized agent shall not issue such approval until he has secured in writing the approval of the state fire marshal, or the appropriate municipal official when certification as described in section 3 has been made, relative to factors concerning fire safety and of the health department having jurisdiction relative to factors affecting water supply, sanitation and food handling.

The superintendent of public instruction shall publish an informative bulletin which shall set forth good school building planning procedures and interpret clearly the provisions of this act. The bulletin shall be prepared in cooperation with the state fire marshal and the state health commissioner and, insofar as requirements for approval of plans are concerned, shall be consistent with recognized good practice as evidenced by standards adopted by nationally recognized authorities in the fields of fire protection and health.

(b) All walls, floors, partitions and roofs shall be constructed of fire-resisting materials such as stone, brick, tile, concrete, gypsum, steel or similar fire-resisting material.

All steel members shall be protected by at least 3/4 of an inch of fire-resisting material.

These regulations shall not be construed as prohibiting the use of finished wood flooring, wood door and window frames, wood sash or wood furring and grounds, for the purpose of installing wood trim, panelling, acoustical units or similar facing materials on masonry walls, structural steel or concrete ceiling members.

(d) Every room enclosing a heating unit shall be enclosed by walls of fire-resisting materials and shall be equipped with automatically closing fire doors; and said heating unit shall not be located directly beneath any portion of a school building or addition thereto which is constructed or reconstructed after the effective date of this act. This regulation shall not be construed to require the removal of an existing heating plant from beneath an existing building when an addition to such building is constructed unless the state superintendent of public instruction or his authorized agent, acting jointly with the state fire marshal, shall so require in the interests of the public safety. In any school where natural gas or any other kind of gas is used for heating purposes, the gas shall be chemically treated before being used in such a manner as to give a very distinguishable odor if any leak should develop in the heating system.

(e) In gymnasiums, fire-proofings may be omitted from the trusses and purlins if they are more than 16 feet off the main floor level. The architect or engineer shall provide adequate exits from all parts of school buildings. In all cases there shall be at least 2 stairways and the distance from the door of any class or assembly room to a stairway or exit shall not exceed 100 feet.

A decision of the board to vary the application of any fire safety rule, or to modify or change a ruling of the municipal enforcing authority, shall specify in what manner the variation, modification or change is made, the conditions upon which it is made, and the reasons therefore.

The principal and interest on any issue of school district bonds issued prior to May 4, 1955, shall be automatically included in computing the amount to be loaned by the state under said section 27 and this act, but the principal and interest on any issue of school district bonds issued on or after May 4, 1955, shall not be included in making such computation, unless the said bonds have been qualified therefor by the superintendent of public instruction, which bonds, including both those automatically qualified and those qualified by the superintendent of public instruction, are sometimes hereinafter referred to as "qualified bonds". No issue of bonds shall be qualified by the superintendent of public instruction unless he shall find as follows, to-wit:

1. That the last maturity date on such issue of bonds is not less than 25 years from the issuance date appearing thereon and that the yearly principal maturity date is not less than 6 months after the major part of the taxes therefor become by law a lien upon the property assessed.

2. That the amount of principal maturing in any calendar year is not less than two-thirds of the amount of principal maturing in any prior calendar year.

3. That the cost of the project for which the bonds are to be issued is within such reasonable standards of costs as shall have been established by the state board of education, which standards may vary as to different localities in accordance with any variance in construction costs as between such localities.

4. That the project is designed to provide classrooms and furnishings, with the facilities necessarily connected therewith, including site, and is adequate for that purpose. A classroom is a room primarily used for teaching courses of study. Without limiting the foregoing, swimming pools, athletic fields and athletic stadiums shall not be deemed to be classrooms or primarily used for teaching courses of study. In addition, gymnasiums and auditoriums shall not be deemed to be classrooms except in those cases in which the school district provides adequate proof that the gymnasium and/or auditorium is necessary and will be used primarily for regularly scheduled instructional purposes.

5. That there exists a need for the project based upon current and probable future enrollment.

6. That there is reasonable evidence that the project will not hinder school district reorganization in the area in the foreseeable future.

7. That the project shall be for the purpose of construction of 6 or more classrooms, unless the superintendent of public instruction shall determine and certify that circumstances of location, or topography, or transportation, or population density are clearly such as to warrant construction of a school building or addition of a lesser number of classrooms.

Provided, That if any project shall exceed the above limitations as to cost and/or purpose, the bonds therefor may be qualified by the superintendent of public instruction to the extent of that percentage which represents the percentage of the project cost which is within such limitations. If the superintendent of public instruction shall find as aforesaid, then he shall issue his certificate setting forth such findings and certifying that the bonds, or such percentage thereof, are qualified under the terms of said section 27 and this act, and that the minimum amount necessary to be levied in any calendar year for principal and interest on the bonds or such portion as may be qualified after deducting any funds pledged to and available for the payment thereof, shall be included in computing the amount, if any, to be loaned by the state under said section 27 and this act. In the case of refunding bonds issued on or after May 4, 1955, to refund bonds issued prior to May 4, 1955, the superintendent of public instruction shall issue his certificate of qualification if he finds that such refunding bonds comply with the qualifications set forth in paragraphs numbered 1 and 2 of this section.

In the case of refunding bonds to refund obligations originally incurred on or after May 4, 1955, the superintendent of public instruction shall not issue his certificate of qualification therefor unless the bonds representing the original indebtedness had been qualified by him. All such certificates shall be kept in a permanent file in the office of the superintendent of public instruction, and copies thereof shall be delivered to the school district and to the office of the municipal finance commission. Application for such a certificate of qualification shall be made on forms prepared and supplied by the superintendent of public instruction. He shall prescribe reasonable rules and regulations in respect thereto. If prior to the issuance of bonds, the school district does not secure such certificate of qualification from the superintendent of public instruction, it shall be deemed to have waived the right to have such bonds so qualified.

388.934 State loans to school districts; procedure; receipts.

Sec. 4. In any school district where the amount necessary to be levied in any calendar year for principal and interest on qualified bonds, shall exceed 13 mills on each dollar of its assessed valuation as last equalized by the state, such school district on or before 60 days prior to the time of the certification of its tax levy to the assessing officer, may file with the superintendent of public instruction a preliminary application for a loan from the state: Provided, That if the excess over 13 mills is reached or increased by reason of bonds voted within said 60 day period, an original or amended application shall be filed within said period. Such application shall set forth the amount of the last state equalized valuation of the school district, the amount of principal and interest on qualified bonds necessary to be levied upon the tax roll of such year, the amount of any moneys on hand pledged to and available for the payment of such principal and interest, the probable delinquency in tax collections at the times such principal and interest will become due, the estimated amount of the loan which will be required from the state and any other pertinent facts which may be required to be included therein by the superintendent of public instruction. The superintendent of public instruction shall examine said application as soon as possible and notify the school district of any erroneous statements or assumptions therein. If a loan from the state shall become necessary for the payment of such principal and interest, then the school district shall file a supplemental application with the superintendent of public

instruction setting forth the amount of the tax collections to the date of said application, an estimate of probable collections prior to the time when such principal and interest will become due and the amount of the loan necessary from the state. Such supplemental application shall be made not less than 30 days prior to the time when the proceeds of the loan will be necessary in order to pay maturing principal and/or interest. Upon receipt of such supplemental application it shall be the duty of the superintendent of public instruction after auditing the same, to forward to the state treasurer a statement setting forth the amount to be loaned to the school district for the payment of principal and interest and the date on or before which such loan shall be made. He shall also prepare the proper voucher as a basis for the issuance of the necessary warrant in accordance with state accounting practices. Upon receipt of such statement and warrant, it shall be the duty of the state treasurer to loan to the school district from "the school bond loan fund" the amount set forth in the statement of the superintendent of public instruction on or before the date specified therein. The state treasurer upon the making of said loan shall obtain from the school district a receipt for the amount so loaned, which receipt shall specify the terms of repayment in accordance with the provisions of said section 27 and this act. Upon receipt by any school district of such a loan it shall be the duty of the treasurer thereof to cause the same to be deposited in the debt retirement fund and used solely for the payment of principal and interest on qualified bonds.

388.935 State loans to school districts; repayment to state; interest.

Sec. 5. Any school district having received a loan from "the school bond loan fund" under the provisions of this act, shall continue thereafter to levy on its tax rolls not less than 13 mills on each dollar of its assessed valuation as last equalized by the state, exclusive of any levy for unqualified bonds, until all loans made to the school district by the state are repaid with interest rates to be annually adjusted by the state administrative board which shall represent the average interest cost to the state on the outstanding bonds issued under said section 27 and any implementing act, computed to the nearest $\frac{1}{8}$ of 1%. The superintendent of public instruction shall annually certify to the several borrowing districts the rate of interest to be currently collected. The proceeds of each such levy shall be used first, for the payment of the minimum principal and interest requirements on the qualified bonds which shall become due prior to the time of the next tax collection, and any balance shall be paid to the state until the principal and interest due the state shall have been paid.

388.938 State loans to school districts; qualification fee; rules and regulations.

Sec. 8. Any school district applying for qualification of bonds, such bonds having been issued on or after May 4, 1955, shall pay a fee for such qualification, which fee shall be used toward defraying the administrative expenses in connection with this act. The fee shall be paid to the superintendent of public instruction within 30 days after the moneys obtained through the sale of bonds so qualified have been received by the treasurer of the board of education of the school district. The amount of the fee to be paid by the school district shall be based upon the total amount of the bond issue included in the application for qualification, and shall be determined by the superintendent of public instruction. The superintendent of public instruction shall prescribe necessary rules and regulations, in accordance with Act No. 88 of the Public Acts of 1943, as amended, being sections 24.71 to 24.82, inclusive, of the Compiled Laws of 1948, and subject to Act No. 197 of the Public Acts of 1952, as amended, being sections 24.101 to 24.110, inclusive, of the Compiled Laws of 1948. The amount of the fee to be charged to the school district may vary according to the amount of the bond issue, except that in no case shall this amount be less than \$100.00, and the total amount to be charged to all school districts in any one fiscal year shall be approximately equal to the estimated administrative expenses in connection with this act for the same fiscal year. Upon failure of any school district to pay such qualification fee within the time specified, the superintendent of public instruction is hereby authorized to withhold the amount of such fee from the payment of state school aid money next due the district: Provided, That the provisions of this section shall not apply to any issue of school district bonds qualified by the superintendent of public instruction prior to July 1, 1956.

Act 108, 1961, p. 118; Eff. Sep. 8.

AN ACT to provide for loans by the state of Michigan to school districts for the payment of principal and interest upon school bonds; to prescribe the terms and conditions thereof, and the conditions upon which levies for bond principal and interest shall be included in computing the amount to be so loaned by the state; to prescribe the duties of the superintendent of public instruction in relation to such loans; to provide for the repayment of such loans; and to provide for other matters in respect to such loans.

The People of the State of Michigan enact:

388.951 Purpose of act.

Sec. 1. The purpose of this act is to implement section 16 of article 9 of the 1963 Michigan constitution, hereinafter referred to as section 16.

HISTORY: New 1961, p. 118, Act 108, Eff. Sep. 8;—Am. 1963, 2nd Ex. Ses., p. 38, Act 33, Eff. Jan. 1, 1964.

388.952 State loans to school districts; basis; limitations.

Sec. 2. (1) If the minimum amount which it would otherwise be necessary for a school district to levy in any year to pay principal and interest on its qualified bonds, including any necessary allowances for estimated tax delinquencies, exceeds 13 mills on each dollar of its assessed valuation as last equalized by the state, then the school

district may elect to borrow all or any part of the excess from the state. In that event the state shall loan the excess amount to the school district for the payment of principal and interest.

Schedule of percentages that may be borrowed; tax levy.

(2) If the minimum amount which would otherwise be necessary for a school district to levy in any year to pay principal and interest on its qualified bonds, including any necessary allowances for estimated tax delinquencies, exceeds 7 mills on each dollar of its assessed valuation as last equalized by the state, the school district may elect to borrow the portion of the excess amount from the state based upon the following formula:

State equalized valuation per pupil of school district		Percentage that may be borrowed by school district over 7 mills
	Under \$ 5,000	100%
\$ 5,001	6,000	90%
6,001	7,000	85%
7,001	8,000	80%
8,001	9,000	75%
9,001	10,000	70%
10,001	11,000	65%
11,001	12,000	60%
12,001	13,000	55%
13,001	14,000	50%
14,001	16,000	40%
16,001	17,000	30%
17,001	20,000	20%

The school district shall levy not less than 18 mills for operating purposes. If the school district levies less than 18 mills for operating purposes, the school district may elect to borrow not more than that percentage set forth above based upon state equalized valuation per pupil times the ratio [sic] of operating millage levied by the school district to 18 mills. In that event the state shall loan the portion of the excess amount to the school district for the payment of principal and interest and the school district shall levy the balance of the excess amount for the payment of principal and interest. Any school district which levies in excess of 18 mills for operating purposes may borrow from the state under the provisions of this act an additional 5% per mill or portion thereof up to 28 mills or a total of 100% whichever comes first based upon that district's position on the formula scale.

Study loans and financing of school construction.

(3) The municipal finance commission, the state board of education, the education committees of the house of representatives and the senate and the appropriation committees of the house of representatives and senate shall study the impact of loans made to school districts from school bond loan fund upon the credit of the state of Michigan, the financing of capital construction of school buildings by school districts, the utilization of the school bond loan fund as a suitable method of financing, the need for corrective legislation, if any, and shall report to the legislature by January 1, 1970.

388.953 Qualified bonds; definition; validation.

Sec. 3. The term "qualified bonds" means general obligation bonds of school districts issued for capital expenditures, including refunding bonds, issued (1) prior to

May 4, 1955, (2) on or after May 4, 1955 but prior to January 1, 1964, only if, and to the extent that, such bonds shall have been qualified pursuant to sections 27 or 28 of article 10 of the 1908 constitution and implementing acts and (3) on or after January 1, 1964, if such bonds shall be qualified pursuant to section 16 of article 9 of the 1963 constitution and this act. All actions heretofore taken by the superintendent of public instruction in qualifying bonds pursuant to sections 27 and 28 of article 10 of the 1908 constitution and implementing acts, are validated and all certificates of qualification heretofore or hereafter issued by him shall be conclusive as to the existence of facts entitling the bonds to be qualified as provided in such certificates and as to such qualification and shall not be subject to attack in any proceeding. Any certificate of qualification issued prior to January 1, 1964, qualifying bonds pursuant to section 28 of article 10 of the 1908 constitution, and the act implementing the same, shall constitute qualification pursuant to section 16 of article 9 of the 1963 constitution and this act, for any bonds sold or delivered to the purchaser thereof on or after January 1, 1964. Any bonds issued between May 4, 1955 and prior to January 1, 1964, that were partially qualified shall be deemed to be 100% qualified bonds if they would be 100% qualifiable under this act as presently amended.

388.954 State loans to school districts; qualifications of bonds; findings of superintendent of public instruction.

Sec. 4. The superintendent of public instruction shall issue his certificate qualifying any issue of bonds, upon application therefor being duly made by the school district, if he shall find as follows, to wit:

(1) That the last maturity date of such issue of bonds is not less than 10 years from the issuance date appearing thereon, except that if the ratio of debt to valuation of the school district exceeds 4%, the last maturity date of such issue of bonds shall be not less than 15 years from the issuance date appearing thereon, if the ratio of debt to valuation of the school district exceeds 7%, the last maturity date of such issue of bonds shall be not less than 25 years from the issuance date appearing thereon, or if the ratio of debt to valuation of the school district exceeds 12%, the last maturity date of such issue of bonds shall be not less than 29 years from the issuance date appearing thereon. The term ratio of debt to valuation as used herein shall be construed to mean that ratio arrived at by dividing the total tax supported bonded indebtedness of the school district outstanding as of the date of the filing of the application required by this act, including the bonds proposed to be qualified, by the assessed valuation of the school district as last equalized by the state, provided that the refunding part of any proposed issue of bonds shall not be included in the total indebtedness of the school district for the purposes of this section.

(2) That the yearly principal maturity date shall be not less than 5 months after the major part of the taxes therefor become by law a lien upon the property assessed.

(3) That the amount of principal maturing in any calendar year is not less than the amount of principal maturing in any prior calendar year and, if the ratio of debt to valuation of the school district (as above defined) exceeds 12%, that the first 10 principal maturities do not in the aggregate exceed 25% of the total principal amount of the bonds proposed to be qualified.

(4) That the cost of the project for which the bonds are to be issued is within such reasonable standards of cost as shall have been established by the state board of education, which standards may vary as to different localities in accordance with any variance in construction costs as between such localities.

(5) That there exists a need for the project based upon current and probable future

enrollment and that the project is designed to provide school facilities reasonably adequate to meet such need.

(6) That a bond issue which a school district wishes to qualify has been given preliminary qualification prior to the official action of the board of education calling for the election on the bond issue.

In the case of refunding bonds issued to refund bonds issued prior to May 4, 1955, the superintendent of public instruction shall issue his certificate of qualification if he finds that such refunding bonds comply with the requirements set forth in paragraph (3) of this section. In the case of refunding bonds issued to refund bonds issued on or after May 4, 1955, he shall issue his certificates of qualification if he finds that such refunding bonds comply with the requirements set forth in paragraph (3) of this section and also that the bonds representing the original indebtedness either were qualified or satisfied the requirements for qualification in effect when issued or would have satisfied the requirements set forth in paragraphs (4), (5) and (6) of this section had such requirements been in effect when said bonds were issued.

388.954a State loans to school districts; use of unexpended balance of proceeds of bonds.

Sec. 4a. Any unexpended balance of the proceeds of sale of any school district bonds heretofore or hereafter issued, remaining after completion of the project, to the extent of 15% of the amount of the issue, with the approval of the electors in the case of bonds issued prior to August 28, 1964, may be used for school construction, equipment and site acquisition and development if such use is approved by the superintendent of public instruction if the bonds are qualified bonds as defined by section 3, or by the municipal finance commission if the bonds have not been so qualified, and any remaining balance shall be paid immediately into the bond and interest redemption fund established for the bonds and shall be used either for the redemption of callable bonds or, prior to the first call date only, for purchasing the bonds on the open market at not more than the fair market value or used to reduce the amount required to be levied to meet current principal and interest on the bonds as they become due.

Sec. 5. All certificates of qualification shall be kept in a permanent file in the office of the superintendent of public instruction and copies thereof shall be delivered to the school district and to the office of the municipal finance commission. Applications for such certificates shall be made on forms prepared and supplied by the superintendent of public instruction and he shall prescribe reasonable rules and regulations in respect thereto. If prior to the issuance of bonds, the school district does not secure such certificate of qualification from the superintendent of public instruction, it shall be deemed to have waived the right to have such bonds so qualified.

388.956 State loans to school districts; preliminary application; approval.

Sec. 6. In any school district where the amount necessary to be levied in any year for principal and interest on qualified bonds, including any necessary allowance for estimated tax delinquencies but excluding any funds pledged to and available for the payment of such principal and interest, exceeds that amount stipulated in section 2, such school district, on or before 60 days prior to the time of the certification of its tax levy to the assessing officer, shall file with the superintendent of public instruction and the municipal finance commission a preliminary application for a loan from the state

in the amount of any part of such excess over that amount stipulated in section 2 which it does not propose to levy in such year. If the excess over that amount stipulated in section 2 is reached or increased by reason of bonds authorized by resolution of the board of education of such school district within such 60-day period, an original or amended application shall be filed within said period. Such application shall set forth the amount of the last state equalized valuation of the school district, the amount of principal and interest on qualified bonds necessary to be levied upon the tax roll of such year, the amount of any moneys on hand pledged to and available for the payment of such principal and interest, the probable delinquency in tax collections at the times such principal and interest will become due, the estimated amount of the loan which will be required from the state, and any other pertinent facts which may be required to be included therein by the superintendent of public instruction. The superintendent of public instruction shall examine said application as soon as possible and notify the school district of any erroneous statements or assumptions therein and within said 60-day period shall approve or deny said preliminary application in whole or in part and shall notify the school district of such action. The school district shall include in its tax levy any amount otherwise required to be levied for the payment of principal and interest on qualified bonds for which it does not secure approval for a state loan as aforesaid.

388.957 State loans to school districts; qualified bonds; application, making of loan, receipts.

Sec. 7. If a loan from the state shall become necessary for the payment of principal and interest on qualified bonds in accordance with such approved preliminary application, or for any reason pursuant to said section 16 of article 9 of the 1963 constitution and this act, then the school district shall file with the superintendent of public instruction a supplemental application (or an original application, if no preliminary application has been filed), setting forth the amount of the tax collections to the date of said application, an estimate of probable collections prior to the time when such principal and interest will become due and the amount of the loan necessary from the state. Such supplemental or original application shall be made not less than 30 days prior to the time when the proceeds of the loan will be necessary in order to pay maturing principal or interest or both. Upon receipt of such supplemental or original application, it shall be the duty of the superintendent of public instruction, after auditing the same, to forward to the state treasurer a statement setting forth the amount to be loaned to the school district for the payment of principal and interest and the date on or before which such loan shall be made. He shall also prepare the proper voucher as a basis for the issuance of the necessary warrant in accordance with state accounting practices. Upon receipt of such statement and warrant, it shall be the duty of the state treasurer to loan to the school district from "the school bond loan fund" the amount set forth in the statement of the superintendent of public instruction on or before the date specified therein. The state treasurer upon the making of said loan shall obtain from the school district a receipt for the amount so loaned, which receipt shall specify the terms of repayment in accordance with the provisions of said section 16 of article 9 of the 1963 constitution and this act. Upon receipt by any school district of such loan, it shall be the duty of the treasurer thereof to cause the same to be deposited in the debt retirement fund and used solely for the payment of principal and interest on qualified bonds.

388.958 State loans to school districts; nonpayment of qualified bonds; payment by state treasurer; repayment to state.

Sec. 8. If for any reason any school district will be or is unable to pay the principal and interest on its qualified bonds when due, then the school district shall borrow and the state shall loan to it an amount sufficient to enable the school district to make the payment. Any school district which finds that it will be or is unable to pay such principal or interest when due shall forthwith make application for the necessary loan and the state shall, in time to prevent default in such payment, make such loan and obtain a receipt therefor as provided in section 7 of this act. In the event that the principal or interest on any qualified bond is not paid when due upon proper presentation of the bond or interest coupon to the agent or officer charged with making payment thereof (irrespective of whether an application for a loan to pay such principal or interest has been made or approved), the state treasurer shall forthwith pay such principal or interest upon presentation of the bond or coupon to him. Any amount so paid by the state treasurer shall be deemed a loan made to the school district pursuant to the requirements of said section 16 of article 9 of the 1963 constitution and this act and the school district shall give a receipt therefor and repay such loan in the same manner as hereinbefore provided with respect to other loans: Provided, That any funds of the school district which are or become available in its hands or in the hands of the paying agent or officer for payment of the principal or interest which has been paid by the state treasurer shall forthwith be remitted to the state treasurer and applied toward repayment of said loan.

388.959 State loans to school districts; repayment, interest.

Sec. 9. Any school district having received a loan or loans from "the school bond loan funds" under the provisions of sections 27 and 28 of article 10 of the 1908 Michigan constitution or section 16 of article 9 of the 1963 constitution and implementing acts shall continue thereafter to levy on its tax rolls not less than that amount stipulated in section 2 on each dollar of its assessed valuation as last equalized by the state, exclusive of any levy for unqualified bonds or for school operating purposes, until all loans made to the school district by the state are repaid with interest at rates to be annually determined by the state administrative board. Such rates shall represent the average interest rate paid by the state on obligations issued under sections 27 and 28 of article 10 of the 1908 constitution and section 16 of article 9 of the 1963 constitution and implementing acts, computed to the nearest 1/8 of 1%. The state treasurer shall annually certify to the several borrowing districts the rate of interest to be currently collected. The proceeds of each such levy shall be used first for the payment of the minimum principal and interest requirements on the qualified bonds which shall become due prior to the time of the next tax collection, and any balance shall be paid to the state until the principal and interest due the state shall have been paid.

Sec. 10. In case any school district obtaining a loan or loans pursuant to either this act or Act No. 151 of the Public Acts of 1955, as amended, being sections 388.931 to 388.938 of the Compiled Laws of 1948, or both such acts, shall fail to levy at least that amount stipulated in section 2 upon its state equalized valuation for debt retirement purposes for qualified bonds and for repayment of any state loan or loans made under the provisions of this act while any part of such loan or loans is unpaid, or shall default in its agreement to repay the loan or loans or any installment thereof, no money shall be distributed to such school district out of the primary school interest fund or out of

the state school aid fund until satisfactory arrangements have been made with the superintendent of public instruction for the payment of the amount in default.
